Tri-Series AFOs

Eastern Podiatry Laboratories introduces three new AFOs: the Tri-Lock, Tri-Flex, and Tri-Motion. The Tri-Lock AFO is a plastic reinforced, leather covered ankle gauntlet. It is available in 11 leather colors and three nubuck colors, four closure types, two standard heights (seven- and nine-inch) or create your own height, and three heel types. Customized braces are built to customer specifications. The Tri-Flex offers the same options as the Tri-Lock, but with a thinner polypropylene shell for more flexibility in treating less severe ankle conditions. The Tri-Motion incorporates all available options with three joint types: articulating, articulating with 90° stop, and dorsi-assist.

**iStep Wave
Foot Scanning**

Aetrex Worldwide introduces the iStep Wave – a completely wireless foot scanning technology that captures three essential elements of feet: foot size, arch type, and pressure points. The iStep Wave features 3,744 gold-plated barometric sensors and 1,326 infrared LEDs to accurately create a two- or three-dimensional blueprint of the foot in less than 30 seconds. Utilizing Aetrex's proprietary 360° Wireless Technology, the iStep Wave is operated with a handheld device, enabling the flat screen monitors and foot scanners to be placed anywhere in the store. Foot scans are displayed in real time and customers can be sent MMS or e-mail messages of their scans.

**KeepingPace
KPO96 Shoe**

KeepingPace, manufacturer of children's orthopedic footwear, announces the arrival of their girls' Mary Jane, style KPO96. Designed to accommodate ankle foot orthoses and adaptive footwear needs, the KPO96 features extra depth-extra widths, a flexible fit, full toe box, molded extended heel counters, medial-lateral supports, and a seamless lining. The uppers are made from high grade nubuck leather materials with breathable mesh, with an adjustable length Velcro strap for easier fitting. Underfoot, the KPO96 features a distinctive sole with a wide tread design, and a unique midsole with a visible cut line. Available in sizes 4 toddler through adult 10.

**Slip-Resistant
Athletic Shoes**

Drew Shoe Corporation introduces its new line of slip-resistant athletic shoes, available in four styles: Men's lace-up (Atlas), Men's Velcro (Apollo), Women's lace-up (Hara), and Women's Velcro (Venus). The shoes feature a removable, dual-density footbed with added heel cushion pad, arch support, and medial heel stabilizer. Each design incorporates a slip-resistant outsole, firm heel counter, tempered steel shank, and foam-padded tongue and collar. The two removable inserts mean the shoes can be customized for added depth or double depth to accommodate prescribed orthotics. Uppers are either all leather or a combination of mesh and leather; linings feature odor and stain control.
