## **Aetrex Launches New Women's Footwear Collection for Therapeutic Market**

TEANECK, N.J. (October 2, 2013)—Apex Foot Health & Wellness, a division of Aetrex Worldwide Inc., debuted Apex Petals, a comprehensive line of women's therapeutic footwear that is designed to provide superior comfort and protection in fashion forward styles. Similar to the other Apex footwear collections, all styles are designed to provide maximum customization and adjustability, fitting flexibility and the ultimate in comfort. The collection offers state-of-the-art features and materials and is recommended for people with diabetes, arthritis or anyone seeking shoes for maximum comfort.

Apex Petals styles were developed by an experienced team of footwear designers, doctors and podiatrists and boast an incredibly light-weight structure making them one of the lightest therapeutic shoes ever made. The multiple removable layers, wide last design and roomy toe box were designed for women who need superior support and customization. All Apex Petals styles proudly feature a certified slip resistant rubber outsole that have been lab tested by SATRA for dry, wet and oil/wet surfaces. The high level of slip resistance provides an extra layer of protection not found in other therapeutic styles. Learn more at [aetrex.com](http://aetrex.com) or visit Medtrade Booth 401.
