PODIATRIC PRODUCTS IN THE NEWS**Aetrex Introduces Stretchable Shoe**

Apex Foot Health & Wellness, a division of Aetrex Worldwide Inc. has announced the launch of the Apex T2000 to the Stretchables Collection, shoes that provide maximum protection and optimum comfort for individuals suffering from diabetes, arthritis or swollen feet. The new addition is designed to limit stress at the areas of the foot most susceptible to pain. The collection includes a single hook and loop strap style that offers adjustability and allows easy entry, even for problem feet.

The Apex Stretchables offer 1/2" removable depth and are constructed with 3 layers that can be removed to provide fitting flexibility and accommodate custom orthotics. Designed from seamless stretchable uppers with smooth insides, the shoes conform to the foot and are safe for people with neuropathy. The soft fabric linings wick away moisture and the tiny vents allow air to flow through promoting a dry and healthy environment for the foot. The shoes are machine washable. The Apex T2000 is PDAC verified for A5500
